### Safe, Clean Water Program Central Santa Monica Bay Watershed Area Steering Committee (WASC)

#### **Meeting Minutes:**

Wednesday, January 9, 2020 10:00am - 12:00pm Veterans Memorial Complex – Garden Room, 4117 Overland Avenue, Culver City, CA 90230

#### Attendees

<u>Committee Members Present:</u> Cung Nguyen (LA County Flood Control District) Neal Shapiro (Santa Monica) Gloria Walton (SCOPE) Bruce Reznik (LA Waterkeeper) Charles Herbertson (Culver City) Josette Descalzo (Beverly Hills) Susie Santilena\* (Los Angeles)

Katie Mika (LA Bureau of Sanitation) Bruce Hamamoto\* (LA County) Rita Kampalath (LA County CEO) Art Castro\* (LADWP) Darryl Ford\* (LA Recreations & Parks) Alex Heide\* (West Basin)

<u>Committee Members Not Present:</u> Jacob Lipa (PSOMAS) Ackley Padilla (Los Angeles) Jeff Camp (Los Angeles)

\*Committee Member Alternate

See attached sign-in sheet for full list of attendees

#### 1. Welcome and Introductions

Mr. Charles Herbertson, the Vice Chair of the Central Santa Monica Bay WASC, called the meeting to order.

All committee members made self-introductions, and quorum was established.

#### 2. Approval of Meeting Minutes from December 19, 2019

The Los Angeles County Flood Control District (District) provided a copy of the meeting minutes from the previous meeting. Mr. Charles Herbertson asked the committee members for comments or revisions.

Mr. Josette Descalzo made a motion to approve the meeting minutes from December 19, 2019. Ms. Susie Santilena seconded the motion. The Committee voted to approve the meeting minutes from December 19, 2019 (unanimous).

#### 3. Public Comment Period

No public comments were received

#### 4. Committee Member and District Updates

Mr. Kirk Allen updated the committee on project submittals, noting that all compiled reports are now available on the SCW Website.

#### 5. Discussion Items:

#### a) Ex Parte Communication Disclosures

Mr. Kirk Allen announced that the Ex Parte Guidelines and COI Q&A will be available in a few weeks. The SCW team will facilitate and seek guidance from County Counsel if there are any concerns.

Mr. Bruce Reznik disclosed that LA Water Keeper along with OWLA are meeting with LA County (Mr. Bruce Hamamoto) and City of LA (Ms. Katie Mika) to discuss their projects. Ms. Katie Mika noted that the project has been under development and ongoing discussions for years. Mr. Kirk Allen recommended committee members to still disclose this type of communication at the committee meeting and to ask questions if there are any.

### b) Summary of feasibility studies, project concepts, and scientific studies submitted for Central Santa Monica Bay WASC for consideration

Mr. Kirk Allen provided a summary of project submittals. Mr. Josette Descalzo asked for Attachement D to be further explained. Mr. Kirk Allen explained how municipal return works after DAC distribution has been made. LA County Consultant Stantec explained how benefits to municipal distribution and DAC are taken over a 5-year rolling period.

Mr. Bruce Hamamoto asked if the committee should evaluate the entire funding of the project for DAC benefits. Mr. Kirk Allen noted that the committee will need to determine if the entire project benefits the DACs or partially.

Ms. Susie Santilena asked who is evaluating the 5-year rolling period of the DAC benefit. Mr. Kirk Allen clarified that it will be part of the SIP development and the District will be working with the committee to define it. Mr. Bruce Reznik inquired if ROC will be doing this assessment. Mr. Kirk Allen clarified that ROC will do that at a larger scale, but it is still a requirement of the WASC to ensure it is done at the individual watershed level as well.

Mr. Bruce Reznik requested that the total ask for Attachment A be included, not just the estimated annual regional program funds. Mr. Kirk Allen clarified that the District is requesting an annualized funding ask for each project from each project applicant. The committee will know how to better schedule funding asks once this data is available.

Mr. Charles Herbertson inquired how the committee will accrue funding throughout the year. Mr. Kirk Allen explained that it is up to the committee to determine the budget.

Ms. Gloria Walton requested that if jobs are created for design, construction, and O&M that this be included as part of the funding summary. Mr. Kirk Allen noted that the information may not be provided in the application and recommended that the committee ask the applicants during the presentation. Ms. Gloria Walton acknowledged that tangible ways will need to be identified for DAC benefits claimed.

Ms. Katie Mika suggested that a discussion on DAC benefits be added to future meeting agenda item. Mr. Bruce Reznik agreed that this discussion is important and needs to be discussed.

Ms. Susie Santilena requested that applicants provide funding breakdown per watershed area if the project is spread into multiple watershed areas.

#### c) Presentations for Scientific Studies Program

#### i) Coordinated Safe Clean Watershed Plans - City of Los Angeles

Mr. Ariel Flores with City of Los Angeles Presented on the Coordinated Safe Clean Water Plans.

Mr. Bruce Reznik inquired how this study will be different than EWMP and IRWMP, and noted he would like to see more community engagement. Mr. Ariel Flores noted that Community Investment benefits focus is the primary difference from the EWMP and IRWMP.

Mr. Josette Descalzo inquired if this study could tie into different plans such as EWMP and IRWMP. Mr. Ariel Flores noted that there are similar water quality goals and there is nexus between the WASC and EWMP groups. This study would be a functional equivalent to the EWMP.

Mr. Charles Herbertson requested how the program defines a scientific Study. Mr. Kirk Allen referred to Page 18 of the Committee Handbook (Section 16.05D3) for the scientific study definition.

Ms. Susie Santilena inquired how modeling and monitoring will be incorporated in this effort. Mr. Ariel Flores noted that modeling would be included, but that monitoring is not part of the study at this time.

Ms. Rita Kampalath inquired what other partners the study is currently engaging other than the City of LA. Mr. Ariel Flores noted that the City of LA will collaborate with the other agencies in the EWMP throughout the process.

Mr. Charles Herbertson inquired if the project will be looking at local and regional funds. Mr. Ariel Flores explained that the study will be looking at coordinating both municipal and regional funds.

Mr. Art Castro inquired if any local funds are being used for the study. Mr. Ariel Flores noted that municipal funds are not being used at this time.

Mr. Bruce Hamamoto inquired if the project could proceed if not approved by all 3 WASCs. Mr. Ariel Flores noted that the project can independently proceed without other WASC approval.

Ms. Susie Santilena noted that other plans of this scale are aspirational without targeting specific solutions and asked how realistic the outcome of this plan will be. Mr. Ariel Flores noted that the study is open for input and direction from WASC.

#### ii) Recalculation of Wet Weather Zinc Criterion - City of Los Angeles Sanitation

Mr. John Ball with LA Sanitation presented on the Recalculation of Wet Weather Zinc Criterion.

Mr. Bruce Reznik noted that LA Waterkeeper is concerned with projects that aim to lower pollution standards, and that community stakeholders are often unable to provide meaningful input on these types of technical studies. Mr. John Ball acknowledged that lessons have been learned from similar previous studies.

Mr. Josette Descalzo inquired on the cost to hire a technical expert. Mr. John Ball noted he would report back with that cost estimate.

### Safe, Clean Water Program Central Santa Monica Bay Watershed Area Steering Committee (WASC)

Mr. Charles Herbertson inquired if the Regional Board would allow the reduction of standards. Mr. John Ball noted that outreach to the Regional Board will be part of the study.

Ms. Susie Santilena noted that it will be important to be transparent about the scientific decision and that there be involvement by NGOs. Ms. Rita Kampalath agreed that the stakeholder involvement be a major part of the study, but that there is also involvement with the State Board.

#### 6. Voting Items:

a) Send all completed feasibility studies to Scoring Committee (SC) for scoring

Ms. Susie Santilena made a motion to proceed sending all completed feasibility studies to the SC for scoring. Mr. Cung Nguyen seconded the motion. The Committee voted to approve sending all completed feasibility studies to the SC for scoring. (unanimous).

#### 7. Discuss Future Meeting Dates/Times

Ms. Susie Santilena suggested that the committee meet on Wednesday mornings. Ms. Gloria Walton noted she is not available Wednesday mornings. Mr. Kirk Allen noted that meeting date and time changes are also subject to venue availability and subject to conflicting other WASC or SC meetings.

Mr. Charles Herbertson suggested to hold the existing next meeting date and check back on availability of the Chair, members, and venue at the next committee meeting.

#### 8. Items for next agenda

The committee requested committee & District Updates, an update on Ex Parte, a schedule of the presentations for the next agenda, a discussion on Community Investment benefits, and a discussion on reoccurring meeting schedule.

#### 9. Adjournment

Mr. Charles Herbertson thanked the committee members and public for their time and participation and adjourned the meeting.

### Coordinated Safe, Clean Watershed Plans: Central Santa Monica Bay January 9, 2020

## **Overview**

- Why is a Safe Clean Watershed Plan being proposed?
- What are the major tasks and proposed schedule?
- What will be the major outcomes?
- How will the WASC and stakeholders be engaged?
- What is the breakdown of requested funding?

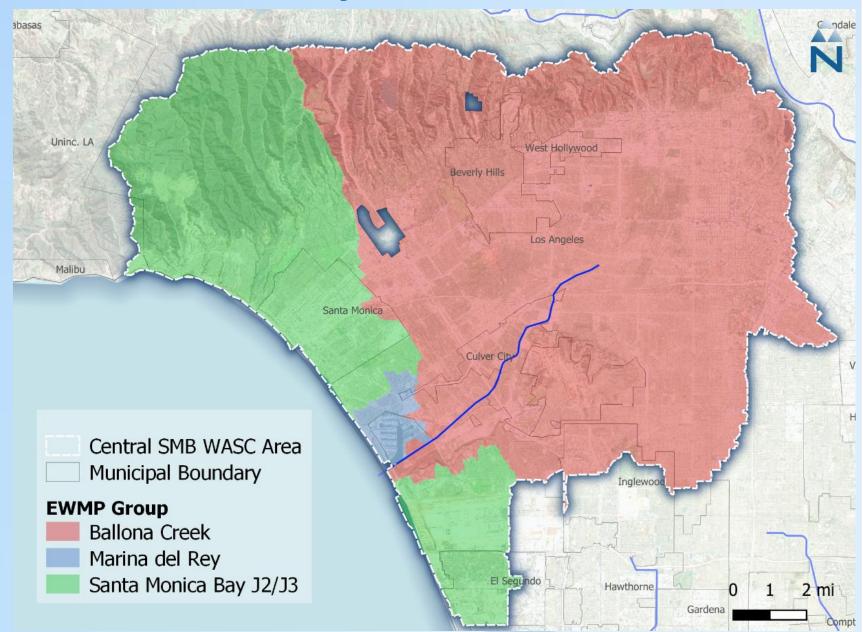

- Strategic planning would help us maximize the return on Measure W investments
- Collaboration among municipalities and community groups would lead to integrated and complimentary projects
- Using smart tools to develop project concepts would create a pool of cost-effective and highly-beneficial projects
- Incorporating EWMPs and water quality compliance requirements would promote integrated, collaborative decision making

Ballona Creek TMDLs			
Trash	2015		
Metals	2016/2021		
Toxics	2021		
Bacteria	2021		
Wetlands	2012		

Santa Monica Bay TMDLs			
Bacteria	2009/ 2021		
Debris	2020		
DDTs & PCBs	2012		
MdR Bacteria	2007/2021		
MdR Toxics	2018		

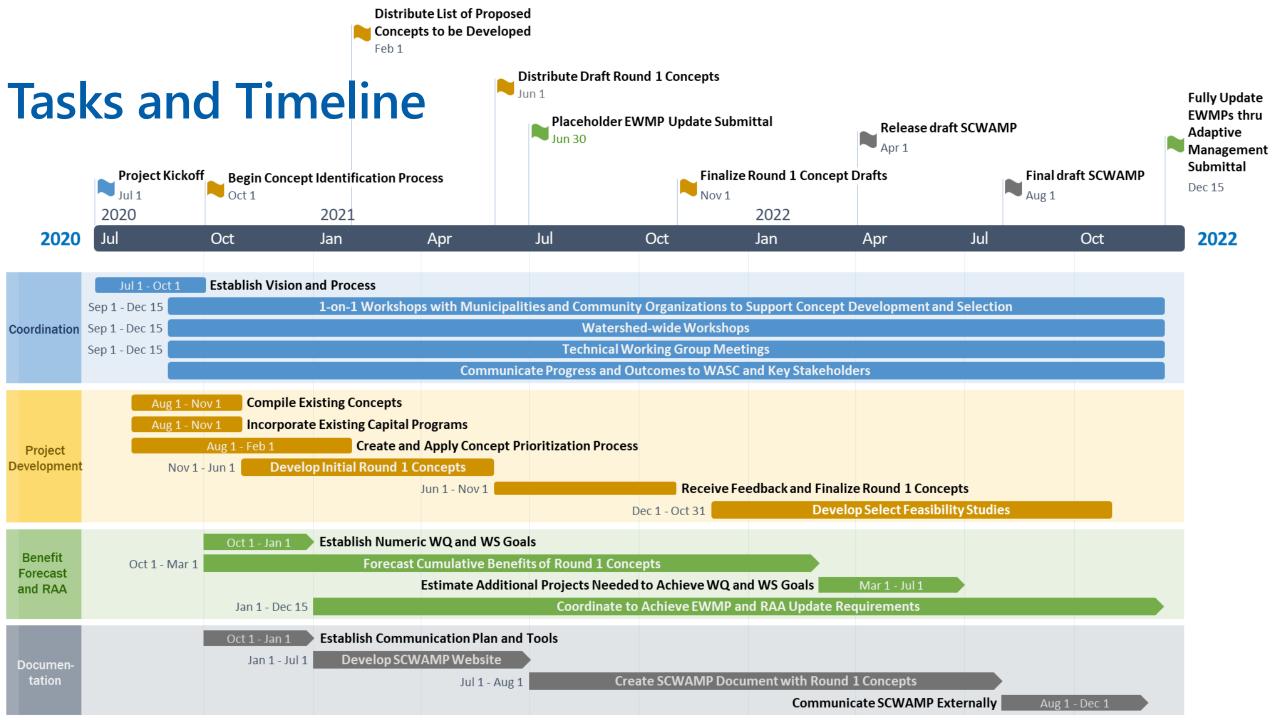

## Safe Clean Watershed Plans: Outcomes

- A pool of 'smart' project concepts for each municipality and major community group (3 to 20 each)
- Living strategic plan for stormwater with multiple benefits
- EWMP and RAA updates
- Website and fact sheets for public engagement

## Safe Clean Watershed Plans: Engagement

- 1-on-1 workshops with each municipality and community group
- Public engagement throughout process
- Guidance by:
  - WASC
  - Watershed Coordinator
  - Working technical group
  - EWMP groups

### **Requested Funding**

Watershed Area	Amount
Central Santa Monica Bay	\$1,786,000
South Santa Monica Bay	\$1,222,000
Upper Los Angeles River	\$1,692,000

 CSMB is highest because it has 3 EWMPs and most impervious area

### Breakdown by Task

Task	Cost
Coordination	\$100,000
Project Development	\$750,000
Benefits Forecast/RAAs	\$786,000
Documentation	\$150,000

### **Breakdown by Year**

Year	Cost
2020-2021	\$650,000
2021-2022	\$700,000
2022-2023	\$436,000

- If we collaborate and integrate our efforts, we'll better protect the environment and public health
- If we use smart planning and prioritization tools, our projects will be more cost effective and beneficial
- If we incorporate EWMPs and TMDL requirements, we'll more effectively address our water quality compliance challenges
- If we better engage the public, we'll gain additional insight while gaining support and promoting positive behavior changes

### THANK YOU.

### Questions and Discussion

# Recalculation of Wet Weather Zinc Criterion

Scientific Study Proposal to Central Santa Monica Bay Steering Committee January 9, 2020

Jon Ball (Environmental Supervisor) Watershed Protection Program LA Sanitation & Environment 323-342-1557 jon.ball@lacity.org

# Objective

### Re-evaluate & Update Zinc Criterion

- USEPA's Recalculation Procedure
- Wet Weather (CTR <u>Acute</u> Criterion)
- Incorporate latest available data
- Site-specific evaluation:
  - Ballona Creek, Dominguez Channel, LA River

# Background

- Zinc is major challenge for EWMPs
  - \$6.5 Billion (Implementation Costs) for BC, DC, and ULAR
- Current Criterion is over 20 years old
  - Based on a nationwide toxicity dataset
    - Includes species that do not occur in our region
  - New data are available!

We must aim at the right target!

# **Overview of the Study**

- Stakeholder engagement:
  - Environmental NGOs
  - Technical Advisory Committee (TAC)
  - LA Regional Board
- Task 1: SIP Analysis
- Task 2: Develop Study Workplan
- Task 3: Recalculation & Report
- Task 4: Implementation Report
- Task 5: Project Management

# **Expected Outcomes**

- Previous Studies show Zinc criterion increase by factor of 1.2 to 2.2
- Potential Cost-savings for EWMP
  - \$300 Million to \$1.1 Billion
- Zinc Problem won't go away!
  - Sizing, cost, and locations of BMPs will be affected.

# **Cost & Schedule**

### Total Cost: \$500,000

- Central Santa Monica Bay: \$89,000 (17.8%)
- South Santa Monica Bay: \$58,000 (11.6%)
- Upper Los Angeles River: \$353,000 (70.6%)

Timeline:

- Start: July 2020
- Completion: July 2023

# **Final Considerations**

- Effective use of Public Funds
- Straightforward Approach
- Support attainment of Water Quality Requirements
- Maintain Protection for Aquatic Life
